

The Journal of Grey System

Contents

Modified Grey Variable Weight Clustering Method Based on Standard Deviation and Its Application Ying Zhu, Yeqing Guan, Naiming Xie, Heng Wang	1
Robust Exponential Stability of Switched Grey Interconnected Systems with Delays Huanbin Xue, Yong Wei	14
Water Use Efficiency and Influencing Factors in the Mekong River Basin Region Based on Grey Relational Analysis Chunyan Xie, Jingchun Feng, Ke Zhang, Haiwei Zhou, Song Xue	28
An Optimization Strategy for Improving Throughput of GPU Global Memory Yanhua Wang, Jianzhong Qiao, Shukuan Lin, Tinglei Zhao	42
Automatic Dictionary Learning Sparse Representation for Image Denoising Hongjun Li, Wei Hu, Wei Wang, Zhengguang Xie	57
Research on Strategic Emerging Industrial Cluster Cooperation Game Based on the Improved Multi-weighted Shapley Value Daao Wang, Lirong Jian , Sifeng Liu , Hui Wang	70
Object-oriented Spatiotemporal Characteristic Attribute Differences Clustering Approach For Panel Data and Its Application Yong Liu, Bingting Quan, Junliang Du	84
The GM (1, N) Model for Mixed-frequency Data and Its Application in Pollutant Discharge Prediction Jiefang Wang	97
A Novel Multi-variable Grey Prediction Model with the Inequality Constraints Yaping Li, Zhen Chen, Liangyan Tao, Sifeng Liu	107

Improved Absolute Degree of Grey Incidence Model Based on Smoothing Noisy Data with Cubic Spline Yongming Chen, Qin Huang	117
