

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – DECEMBER 2005

- 241 **Editorial** – *R&D Functions of the Crop Protection industry* – Ken Pallett, Bayer CropScience
- 244 **Reviewing some origins of pesticide perceptions** – Robert Krieger, Extension Toxicologist, University of California, Riverside and winner of the American Chemical Society's International Award for Research in Agrochemicals at the 229th National Meeting March 13 – 17, 2005 in San Diego, California summarises his award lecture in which he described the origins of public perceptions of pesticide risk and the difficulties associated with countering these views
- 249 **Managing Hairy Nightshade to Reduce Potato viruses and Insect Vectors** – Juan M. Alvarez, Entomologist, and Pamela J.S. Hutchinson, Weed Scientist, Department of Plant Soil and Entomological Sciences, University of Idaho, Aberdeen R & E Center, 1693 S. 2700 W. Aberdeen, ID 83210, USA describe the problems that can be caused by hairy nightshade plants acting as a reservoir for potato viruses and a host for their vector, *Myzus persicae*
- 253 **A green locust control for Australian farmers** – Louise Lawrence, CSIRO Entomology describes the development of the microbial insecticide, *Metarhizium*, for locust control in Australia
- 255 **Company news** – reports on mergers, acquisitions, collaborations and sales
- 257 **The potential impact of the Water Framework Directive on the use of pesticides in UK agriculture** – Paul Kay and Tim Pepper, ADAS UK Ltd, Gleadthorpe Research Centre, Meden Vale, Mansfield, Nottinghamshire, NG20 9PF, UK discuss the Water Framework Directive and consider the potential effects it will have on UK farming
- 263 **The BCPC International Congress and Exhibition – Crop Science and Technology 2005 Glasgow – 31 October–November 2005** – Graham Matthews, John Peregrine and Len Copping review some of the sessions and summarise the 'take home' messages.
- 268 **DPVweb: An open access internet resource on plant viruses and virus diseases** – Michael J Adams and John F Antoniow, Wheat Pathogenesis Programme, Plant-Pathogens Interactions Division, Rothamsted Research, Harpenden, Herts AL5 2JQ UK describe a major source of information on plant viruses and the diseases they cause
- 271 **R&D news** – reports on new products, new applications and new uses
- 273 **GIS-Aided application of plant protection products** – Heinz Ganzelmeier, Fachgruppe Anwendungstechnik, Biologische Bundesanstalt für Land- und Forstwirtschaft, Messeweg 11-12, 38104 Braunschweig, Germany outlines how the application of Geographical Information Systems to spray application will benefit the farmer and reduce the possibilities of drift into environmentally sensitive areas
- 277 **Hydrilla, The Perfect Aquatic Weed, Becomes More Noxious than Ever** – Franck E. Dayan and Michael D. Netherland from the USDA-ARS Natural Products Utilization Research Unit (National Center for Natural Products Research, Mississippi, USA) and the USAE ERDC (Center for Aquatic and Invasive Plants, Florida, USA), respectively, review hydrilla's invasiveness and its evolved resistance to fluridone, an inhibitor of phytoene desaturase.
- 283 **Biotechnology news** – developments in molecular biology and genomics
- 285 **Regulatory news** – new registrations, environmental effects and withdrawals
- 288 **Calendar of Events**
