

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – DECEMBER 2007

- 242 **Editorial** – *What is good science? A personal view*
- 245 **The 2007 BCPC/IPPC Congress in Glasgow** – Leonard Copping, John Peregrine and Graham Matthews review some of the sessions at the recent XVI IPPC meeting
- 254 **Regulatory news** – *new registrations, environmental effects and withdrawals*
- 257 **An update on Bt resistance in *Helicoverpa* in Australia** – Rod Mahon, Sharon Downes, Karen Olsen and Tracey Parker describe the importance of monitoring the potential for the onset of resistance in transgenic Bt cotton
- 260 **In Search of Darwin's Nematodes** – Dave Moore, Steve Edgington, Andrés France and Loreto Merino ask why did Charles Darwin select finches for special study, when he could have used nematodes?
- 263 **R&D news** – *reports on new products, new applications and new uses*
- 265 **Changing the priorities in the management of Potato Cyst Nematodes** – Ken Evans and Brian Kerry outline the problems associated with potato cyst nematode in the UK and strategies that can be employed to help to reduce the problems they cause
- 270 **Company News** – *reports on mergers, acquisitions, collaborations and sales*
- 274 **Citrus Canker and Citrus Huanglongbing, Two Exotic Bacterial Diseases Threatening the Citrus Industries of the Western Hemisphere** – Tim R. Gottwald describes the introduction, spread, and economic devastation caused by canker and Huanglongbing in Florida and Brazil and the threat to other western commercial citrus industries
- 280 **Vanishing Honey Bees – Colony Collapse Disorder** – Nancy N. Ragsdale reviews information provided by Kevin Hackett and Kim Kaplan
- 283 **Biotechnology news** – *developments in molecular biology and genomics*
- 286 **Obituary** – Michael Elliott, CBE, DSc, FRS
- 287 **Book Review**
- 288 **Calendar of Events**
