

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

# OUTLOOKS ON PEST MANAGEMENT

FREE site-wide web access to the electronic form of this journal is provided with a full-rate subscription. See [www.pestoutlook.com](http://www.pestoutlook.com) for more information or email [info@researchinformation.co.uk](mailto:info@researchinformation.co.uk)

## CONTENTS

COVER – Sunflowers in Fargo, North Dakota. Photo by Bruce Fritz. Reproduced courtesy of USDA-ARS.

- 98 **Editorial** – *Changes in Pest Management* – Graham Matthews, International Pesticide Application Research Centre (IPARC), Imperial College, Silwood Park, UK
- 99 **Biotechnology news** – *developments in molecular biology and genomics*
- 101 **Company news** – *reports on mergers, collaborations, sales*
- 103 **R&D news** – *reports on new products and innovations*
- 105 **Regulatory news** – *new registrations, environmental effects and withdrawals*
- 108 **Hazards associated with pesticides** – *argument from both the pro and anti crop protection groups*
- 109 **ACS National meeting, Spring 2004, Anaheim, CA, USA** – Nancy Ragsdale, Don Wauchope, Allan Felsot, Stephen Duke, John Clark, Bill Hall and Derek Gammon highlight the presentations at the American Chemical Society's conference that relate to pest control
- 112 **SOT Conference, March 21–25, 2004. Baltimore, MD, USA** – Derek Gammon reviews the most significant topics and those with the biggest impact on pesticide toxicology and regulation that were raised at the recent SOT Conference
- 115 **14th International Reinhardsbrunn Symposium, Germany. Modern Fungicides and Antifungal Compounds** – Phil Russell describes some of the new and exciting work on the control of fungi that was presented at the 14th International Rheinardsbrunn Symposium
- 118 **Search for methyl bromide and phosphine alternatives** – Len Caddick, CSIRO, Stored Grain Research Laboratory, Australia introduces possible alternatives to methyl bromide and phosphine for use in grain stores
- 120 **QuickPHlo-C™ technology delivers phosphine** – Colin Waterford, CSIRO, Australia tells of a new method of delivering phosphine safely and effectively to stored grains
- 122 **Improving recombination events in plants** – Chris West, Centre for Plant Sciences, University of Leeds, UK describes ways of improving the efficiency of introducing genes into plants
- 125 **Understanding virus genomes** – Ashley Banyard, Department of Molecular Biology, Institute for Animal Health, Pirbright, UK explains the molecular determinants of pathogenicity in the rinderpest virus
- 127 **Herbicide Treated Mulches: More Bite to Bark** – Hannah Mathers, Ohio State University, USA describes the benefits of using bark mulches that incorporate soil active herbicides as a weed control strategy in ornamentals
- 131 **Management of Rodent Pests and Island Conservation** – Alan Buckle, University of Reading, School of Animal and Microbial Sciences, Reading, UK examines the destructive effects rodents can have when introduced to new environments and the ways in which these pests can be managed
- 135 **Weed seed banks** – Hamish Kidd, Cambridge, UK summarises work on weed seed physiology being undertaken by the USDA
- 138 **Better biological control of weedy blackberry** – Louise Lawrence, CSIRO Entomology describes the problems caused by alien blackberry in Australia and the research that led to better biological control approaches
- 140 **Book Reviews**
- 144 **Calendar of events**
