

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

FREE site-wide web access to the electronic form of this journal is provided with a full-rate subscription. See www.pestoutlook.com for more information or email info@researchinformation.co.uk

CONTENTS

COVER – Sunflowers in Fargo, North Dakota. Photo by Bruce Fritz. Reproduced courtesy of USDA-ARS.

- 194 **Editorial** – *Who is going to do pesticide research?* – Nancy Ragsdale, USDA, Beltsville
- 196 **Regulatory news** – *new registrations, environmental effects and withdrawals*
- 200 **R&D news** – *reports on new products, new applications and new uses*
- 203 **Biotechnology news** – *developments in molecular biology and genomics*
- 206 **Company news** – *reports on mergers, acquisitions, collaborations and sales*
- 209 **Two choices for agchem/agbiotech industries: the only way to go is down** – Jonathan Gressel offers new thoughts on the agchem/agbiotech industries and on ways to increase sales and to help the developing world
- 211 **Endocrine disrupting chemicals in the environment** – Taravat Ghafourian and Mark Cronin describe the effects that some chemicals have on non-target organisms in the environment
- 215 **Risk assessment research essential to genetic engineering progress** – Janet Kim Kaplan weighs up the opportunities and the risks associated with the introduction of GM-crops and shows how these risks can be assessed
- 217 **Can biotechnology and genomics offer better routes to crop protection?** – Huw Jones & Kostya Kanyuka outline the opportunities that exist through the application of emerging technologies in the search for new approaches to crop protection
- 222 **Container Fumigation of trade commodities** – Somiahnadar Rajendran describes the problems associated with the spread of alien insects in containerised shipping and methods of controlling them
- 229 **Snail research comes of age** – Louise Lawrence, Emma Leonard and Geoff Baker tell of the problems caused by alien snails and of new methods for their control
- 231 **The International Weed Science Society** – Bernal E. Valverde and Stephen O. Duke tell of the formation and the objectives of the International Weed Science Society.
- 233 **ACS National Meeting, Fall 2004** – Nancy Ragsdale, Bill Hall, John Johnston, Joe Rosen and Don Wauchope summarise key moments from the recent ACS national meeting
- 236 **The Pest Management Group of SCI – 50th Anniversary (1954 to 2004)** – Richard Greenwood tells of the formation of the Group and outlines its current aims and objectives
- 238 **IPM at AK ALTIN** – Graham Matthews tells of how one of the world's largest cotton producers still relies very much on biological control, but with a larger wheat area it faces the need for a more integrated pest management approach and improve use of pesticides in its farming system
- 240 **Calendar of events**
