

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – June 2011

- 98 **Editorial** – *Agriculture in the UK – A Second Rate Science?* – Alan M. Dewar
- 100 **Outlook on Weed Management in Herbicide-resistant Crops: Need for Diversification** – Jerry M. Green discusses the evolution of weed management from the introduction of glyphosate-resistant crops to its future with multiple herbicide-resistant crops
- 105 **Regulatory News** – *new registrations, environmental effects and withdrawals*
- 109 **Plant Science Garden Üplingen: Plant Research and Sustainable Agriculture** – Kerstin Schmidt
- 111 **Transgenic Crops – The Registration Status of Lines other than Maize that have been Commercialised: The Second Article of Two that Examine the GM Crop Market** – James McLaren & Len Copping present an outline of GM commercial lines
- 118 **Book Review – The GM Crop Manual**
- 119 **Biotechnology News** – *developments in molecular biology and genomics*
- 122 **Classical Biological Control of Invasive Species: Fighting Fire with Fire** – Raymond I. Carruthers
- 129 **Medical Entomology in the United States Department of Defense: Challenging and Rewarding** – Stanton E. Cope, George B. Schoeler & Gregory M. Beavers
- 135 **R&D News** – *reports on new products, new applications and new uses*
- 138 **Mite Pest-resistant Cotton be a Little Closer?** – David Thompson outlines CSIRO's search for cotton varieties with a natural resistance to spider mites
- 140 **Plant Breeding: Its Contribution to Durable Disease Control** – James K.M. Brown
- 145 **Company News** – *reports on mergers, acquisitions, collaborations and sales*
