

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – August 2011

- 150 **Editorial** – *Congratulations and Welcome to the Real World* – Nancy Ragsdale
- 152 **The Spread of the Harlequin Ladybird in Britain** – Richard Comont & Helen Roy
- 156 **Regulatory News** – *new registrations, environmental effects and withdrawals*
- 160 **Plant Defense Activators and Control of Turfgrass Diseases** – T. Hsiang, P.H. Goodwin & A.M. Cortes-Barco *review plant defence activators and their potential for disease control in turfgrass*
- 165 **Management of Pesticides Used in Vector Control: A Global Assessment** – Graham Matthews *summarises the World Health Organization's recent global survey to assess the current status of public health pesticide management*
- 168 **Biotechnology News** – *developments in molecular biology and genomics*
- 171 **Integrated Pest Management in the National Park Service and the U.S. Fish and Wildlife Service** – Carol DiSalvo & Tiffany Parson
- 177 **US Tart Cherries: Pesticide Policy and the Precautionary Principle** – Mark Whalon & Paul Glasser
- 183 **R&D News** – *reports on new products, new applications and new uses*
- 186 **United States Agricultural Chemical Usage** – Dale P. Hawks & Douglas Farmer
- 187 **Book Review – Glyphosate Resistance in Crops and Weeds: History, Development and Management** – Leonard G. Copping
- 188 **Book Review – A Practical Guide to Turfgrass Fungicides** – P.E. Russell
- 189 **Pest Management Practices Aimed at Curtailing Citrus Huanglongbing Disease** – David G. Hall & Tim R. Gottwald *provide an update on management strategies for this serious, insect-vectorated disease of citrus*
- 193 **Company News** – *reports on mergers, acquisitions, collaborations and sales*
- 196 **Calendar of Events**

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes (Ochlerotatus) sp.* mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. perniciosa*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver spp.*) (Photo by Alan Dewar)
