

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

# OUTLOOKS ON PEST MANAGEMENT

## CONTENTS – April 2012

- 50 **Editorial** – *Climate Change Mitigation Through Effective Pest, Disease and Weed Control – Making the Case by Making the Connection* – Ian Crute
- 52 **Book Review** – *Integrated Pest Management for Collections Proceedings of 2011: A Pest Odyssey, 10 Years Later*
- 53 **Status of Alternatives for Methyl Bromide in the United States** – Judy A. Johnson, Spencer S. Waise & James S. Gerik outline the current situation regarding possible replacements for methyl bromide in US agriculture
- 59 **Regulatory News** – new registrations, environmental effects and withdrawals
- 62 **The Impact of Activists on Pest Management and Crop Science** – Martin Livermore considers how single issue pressure groups can delay the adoption of new technology in the developing world
- 65 **Genetically Modified Insects for Pest Control: An Update** – Neil I. Morrison & Luke Alphey of Oxitec Ltd describe progress towards offering public health and agriculture new pest control options
- 69 **Biotechnology News** – developments in molecular biology and genomics
- 72 **The Past, Present and Future of Sudden Oak Death** – Janice Alexander
- 77 **The Potential Impact of Recent EU Legislation on the Future of Home Garden Pesticides** – Robert W. Daniels
- 82 **R&D News** – reports on new products, new applications and new uses
- 85 **Developments on the Regulation of Endocrine Disrupting Substances in Europe – Hazard, Risk and the Need for a Scientific Approach** – James R. Wheeler, Richard M. Green & Lennart Weltje
- 92 **Company News** – reports on mergers, acquisitions, collaborations and sales
