

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – August 2013

- 146 **Editorial** – *If Neonicotinoids Go, What Next?* – Alan M. Dewar, Editorial Board Member
- 147 **Neonicotinoids and Bees – A Never Ending Story** – Leonard Copping summarises recent developments
- 151 **Data, Data Everywhere But We Don't Know What to Think? Neonicotinoid Insecticides and Pollinators** – Keith Walters reviews the data that have been generated on neonicotinoid effects on pollinators
- 156 **Neonicotinoid Restrictions Present a Unique Opportunity to Introduce Safer Agro-Ecological Approaches to Pest Management** – Nick Mole, Stephanie Williamson, Paul Lievens & Keith Tyrell discuss issues around this controversial EU legislation and the debate on links between pesticides and pollinator declines
- 160 **Regulatory News** – new registrations, environmental effects and withdrawals
- 164 **Herbicide Resistance in Turfgrass: An Emerging Problem?** – J.T. Brosnan & G.K. Breeden reveal the threat of resistance to herbicides in turfgrass
- 169 **Biotechnology News** – developments in molecular biology and genomics
- 173 **Mosquito Larval Source Management by Water Level Control** – Jeffrey S. Juel considers new effective approaches for mosquito control
- 176 **Insect Pests of Trees Arriving and Spreading in Europe** – Dominic Eyre, Helen Anderson, Richard Baker & Ray Cannon
- 181 **R&D News** – reports on new products, new applications and new uses
- 184 **The Evolution of Modern Seed Treatments** – Bill Hairston outlines the development of today's seed treatments
- 187 **Company News** – reports on mergers, acquisitions, collaborations and sales
- 191 **Monsanto Withdraws GM Applications in EU** – Leonard G. Copping
- 192 **Calendar**

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes* (*Ochlerotatus*) sp. mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. pernicioso*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver* spp.) (Photo by Alan Dewar)
