

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

# OUTLOOKS ON PEST MANAGEMENT

## CONTENTS – February 2014

- 2 **On the Public Understanding of Science** – Leonard G. Copping, Editorial Board Member
- 4 **Forecasting Eyespot Development and Yield Loss in Winter Wheat Crops in Order to Guide Management Decisions** – Fiona Burnett & Gareth Hughes describe approaches to the estimation of disease incidence and associated yield loss
- 7 **Regulatory News** – new registrations, environmental effects and withdrawals
- 11 **Managing Overabundant White-Tailed Deer: Is it Time to Consider Regulated Commercial Harvest?** – Scott Hygnstrom, David Drake, Timothy van Deelen & Stephen Vantassel
- 17 **Discovery of a Gene that Controls Black Grass Resistance Offers Prospect of Better Weed Control** – Leonard G. Copping
- 18 **Biotechnology News** – developments in molecular biology and genomics
- 22 **Current and Future Insect Threats to UK Forestry** – Simon Leather outlines the threats faced by UK forestry from native and invasive insect pests
- 25 **A Retrospective: The Impact of Research on Cotton Pest Control in Central Africa and Development of Ultra-Low Spraying for Small Scale Farmers Between 1958–72** – Graham Matthews recalls how targeted research contributed to pest control in cotton
- 29 **R&D News** – reports on new products, new applications and new uses
- 33 **Facing the Resistance Crisis in Malaria Control by Developing and Evaluating ‘Resistance-Breaking’ Products** – Hilary Ranson
- 36 **The Value of Genetically-Modified Crops for Weed Control** – David R. Shaw
- 38 **Company News** – reports on mergers, acquisitions, collaborations and sales
- 41 **Larval Source Management: A Supplementary Measure for Malaria Control** – Lucy S. Tusting discusses the role of mosquito larval source management in malaria control
- 44 **The Situation Regarding Bees and Neonicotinoids Continues to Generate Arguments** – Leonard G. Copping
- 46 **Honey and GM Pollen** – Leonard G. Copping
- 48 **Calendar**

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes (Ochlerotatus) sp.* mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. perniciosa*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver spp.*) (Photo by Alan Dewar)
