

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

OUTLOOKS ON PEST MANAGEMENT

CONTENTS – August 2014

- 250 **Now the Chickens Will Come Home to Roost** – *Alan M. Dewar, Editorial Board Member*
- 252 **Balancing Food Production and Biodiversity Conservation in Arable Landscapes: Lessons from the Farm4Bio Experiment** – *Jonathan Storkey, John M. Holland, Ian G. Henderson, Peter J.W. Lutman, Jim Orson, Jason Baverstock & Judith K. Pell summarise the findings of the Farm4Bio experiment*
- 257 **Regulatory News** – *new registrations, environmental effects and withdrawals*
- 261 **The Old World Bollworm in the Neotropical Region: The Experience of Brazilian Growers with *Helicoverpa Armigera*** – *Adeney de Freitas Bueno & Daniel Ricardo Sosa-Gómez describe how the old world bollworm was identified in Brazil and the strategy employed to control it*
- 265 **The Future of Insect Repellent Discovery and Development** – *Jonathan D. Bohbot, Daniel Strickman & Laurence J. Zwiebel describe the technologies and challenges involved with the discovery and development of next-generation insect repellents*
- 271 **Biotechnology News** – *developments in molecular biology and genomics*
- 274 **The Nature and Benefits of Drip Irrigation** – *Richard Faulkner*
- 279 **Aerial Spray Drift – Consequences of Spraying Small Droplets of Herbicide** – *Graham Matthews identifies the problems associated with the aerial application of herbicides*
- 284 **R&D News** – *reports on new products, new applications and new uses*
- 287 **Nematode Management in Florida Vegetable and Ornamental Production** – *Nancy Kokalis-Burelle, Fanny B. Iriarte, David M. Butler, Jason C. Hong & Erin N. Rosskopf*
- 294 **More Claims in the Pollinator Debate** – *Leonard G. Copping*
- 296 **Company News** – *reports on mergers, acquisitions, collaborations and sales*
- 300 **Calendar**

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes (Ochlerotatus) sp.* mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. pernicioso*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver spp.*) (Photo by Alan Dewar)
