

An international journal covering the management of weeds, pests and diseases through chemistry, biology and biotechnology

# OUTLOOKS ON PEST MANAGEMENT

## CONTENTS – April 2019

- 50 **Editorial: Is the European Crop Protection Industry Threatened by the Drive Towards Transparency?** – *Robin Blake*
- 53 **Survey Reveals Training Needs for Airblast Sprayer Applicators, Farm Managers, Owners and Pest Control Advisers** – *Lynn R. Wunderlich, Franz J. A. Niederholzer, Lisa Blecker, Rhonda J. Smith, Matthew Strmiska, Emily Symmes & Stephanie Bolton in California, pesticide applicators and/or their supervisors routinely complete mandatory pesticide safety training; however, little training in spray application calibration or pesticide drift management is required to apply, supervise or prescribe pesticides*
- 60 **Regulatory News** – *new registrations, environmental effects and withdrawals*
- 64 **The War on Glyphosate Spreads** – *Eric Sfiligoj claims there is increasing pressure being put on the herbicide glyphosate internationally which leads to poor recommendations being made by pesticide regulators*
- 65 **Even the Reporting on Glyphosate is Poorly Presented** – *Leonard G. Copping*
- 67 **Loss of Insecticides in Managed Amenity Turf: Impacts and Implications** – *Ruth Mann summarises the current options that are available for the control of insects in amenity turf*
- 71 **Biotechnology News** – *developments in molecular biology and genomics*
- 75 **Botanical Biopesticides – Where to Now?** – *Simon R. Leather & Tom W. Pope ask what are the problems facing the use and take-up of plant based pesticides in the UK and EU*
- 78 **Biopesticides Call for Tailor-Made Assessment** – *Hans van Boven notes that the interest in low-risk plant protection products is rising, but their regulation needs attention*
- 81 **R&D News** – *reports on new products, new applications and new uses*
- 85 **Pesticides: Residues in Crops and Their Application** – *Graham Matthews explains that increasing use of pesticides in China has highlighted that many crops are harvested with residues that affect export of produce*
- 89 **FAO Report on Biodiversity for Food and Agriculture** – *sustainable agriculture is the answer to reverse trends that lead to biodiversity loss*
- 95 **Company News**
- 99 **Calendar**

COVER PHOTOS: Cotton bollworm (*Helicoverpa zea*) (Photo by Scott Bauer) and *Aedes (Ochlerotatus)* sp. mosquito on human skin both reproduced courtesy of USDA-ARS; Cocoa showing both frosty pod rot (*Moniliophthora roreri*) and witches' broom (*M. perniciosa*) on the same branch (Ecuador) (Photo by Roy Batemen); Unsprayed strip in sugarbeet showing poppies (*Papaver* spp.) (Photo by Alan Dewar)
