

THE INTERNATIONAL JOURNAL FOR TECHNOLOGY IN MATHEMATICS EDUCATION

Volume 24, Number 2

**Technology and its Integration into
Mathematics Education
TIME 2016**

Guest Editors:

José Luis Galán-García

Gabriel Aguilera-Venegas

- 47 Editorial
- 51 Hypothetical Learning Trajectories that use digital technology to tackle an optimization problem
By Rubén Elizondo and Armando Hernández-Solís
- 59 The Impact of Computer use on Learning of Quadratic Functions
By Sirje Pihlap
- 67 The New Technologies in Mathematics: a Personal History of 30 years
By Agustín de la Villa, Alfonsa García, Francisco García and Gerardo Rodríguez
- 75 Dynamic Geometry Software And Tracing Tangents In The Context Of The Mean Value Theorem: Technique And Theory Production
By Cesar Martínez-Hernández and Ricardo Ulloa-Azpeitia
- 83 Modelling in action. Scaffolding High School Students to Higher Levels of Autonomy: The School's Elevator and the Inverse Problem
By Eugenia Marmolejo Rivas
- 89 Design and use online platforms to learn mathematics and the use of them in simulations of problems in applied sciences
By Ricardo Méndez-Fragoso, Mirna Villavicencio-Torres and Josué Martínez-Moreno.
- 95 Analysis of a Nonlinear Oscillator with CAS through Analytical, Numerical, and Qualitative Approaches: a prototype for teaching
By Jeanett López-García and Jorge Javier Jiménez Zamudio.
